
Server – encrypted domain, no decryption key
Plaintext patient features x
Encode & encrypt
Polynomial comparison (degree k, per split)
Balanced path product (per leaf, zero rotations)
Leaf-aligned aggregation (rotate-and-add)
Decrypt & decode
Margin-space score
Client
Client
$k \in \{3, 5, 7, 9\}$ locked family
depth $\lceil \log_2 D \rceil$, folds leaf coeff.
real, measured cost (latency results)
